eScan Internet Security Suite with Cloud Security wins AV-Comparative Certification

August XX, 2013:

eScan, one of the leading Anti-Virus and Content Security Solution providers, has been recognized for its world-class protection by bagging yet another prestigious award from AV-Comparatives during the month of March – June 2013. The test illustrates the overall performance and behavior of eScan Internet Security Suite with Cloud Security in a real-world environment.

AV-Comparatives is an independent organization that is globally recognized offering systematic testing that checks whether security software, such as PC/Mac-based antivirus products and mobile security solutions, lives up to its promises. During this period, from March 2013 to June 2013, a total of 1972 malicious test cases were tested. eScan successfully received the Advanced+ Award from AV-Comparatives with a protection rate of 99.3%.

On receiving the certification, Mr. Govind Rammurthy, MD & CEO, eScan said, "It's a great honor to receive the prestigious certification from AV Comparatives. This shows that amidst of evolving cyber threats, eScan provides the highest level of protection, thus ensuring secured computing environment to our customers. We feel the gratitude in our commitment towards creating security solutions that are effective against zero-day malware attacks"

"We're very pleased that eScan Internet Security with Cloud Security has been awarded this status. This win further strengthens our mission in the African market to offer a superior solution at an affordable price to our customers" says Lee Milroy, CEO of Secure Lab.

About eScan:
eScan, one of the leading Anti-Virus & Content Security solutions for Desktops & Servers is developed and marketed by MicroWorld. It is powered by innovative and futuristic technologies, such as MWL Technology, DIRC Technology, NILP Technology, and sophisticated Anti-Virus Heuristic Algorithms that not only provides protection from current threats, but also provides proactive protection against evolving threats. eScan provides 24x7 free remote support facility, integrated in the software to help customers to get their malware related issues resolved in the fastest possible time-frame. It has achieved several certifications and awards from some of the most prestigious testing bodies, notable among them being Virus Bulletin, AV-Comparatives, ICSA, and PCSL labs. Combining the power of various technologies, eScan provides Multi-level Real-time Protection to Computers and Networks.

About Secure Lab:
Secure Lab is a leading Southern African service-focused distribution partner based in Johannesburg, South Africa.
Secure Lab delivers the best in security and networking solutions, tailor-made to suit individual and organisational needs. In today's complex technological landscape, the challenge is to find exceptional talent paired with exceptional quality solutions. Our unmatched service levels and personal attention has made us the distributor of choice for many businesses around Southern Africa.
Our product portfolio is consisted of solutions from leading international vendors that have a proven-track record through their industry accreditation and awards. We provide our business partners with solutions that are quality assured and priced right. For more information, please visit www.securelab.co.za.
